European Innovation Act

- ICMCI contributed to the consultation in autumn 2025
- Professional competences and innovation management capabilities
- Qualified advisory support to help SMEs implement innovation
- Continuation of the Brussels engagement and EU Transparency Register positioning

European Commission proposal, September 2026

The proposal aims to help European innovations reach the market and scale across borders, strengthening industrial leadership, EU competitiveness and technological sovereignty.

Qualified expertise and intangible assets can improve access to finance through:

- IP valuation: recognise intangible value and support commercialisation with expert advice.
- R&D procurement: reward technological value and specialist competences in public contracts.
- Regulatory sandboxes: test new technologies and demonstrate technical capabilities.
